Department of Mass Communication
Abanindranath Tagore School of Creatives Arts and
Communication Studies

Assam University, Silchar
(A Central University constituted under Act XIII of 1989)
Silchar – 788011, Assam, India

DECLARATION

I, Rajeev Lourembam bearing Registration No. Ph.D. 2000/2012 dated 01/10/2012, hereby declare that the subject matter of the thesis entitled **"Role of Mobile Communication in Rural Development: A study on Imphal West District of Manipur"** is the record of work done by me and that the contents of this thesis did not form the basis for award of any degree to me or to anybody else to the best of my knowledge. The thesis has not been submitted in any other University/Institute.

Place: Silchar
Date: 18-06-2016

Rajeev Lourembam
(Rajeev Lourembam)

ACKNOWLEDGEMENTS

I would like to express my special appreciation and thanks to my supervisor Dr. Raghavendra Mishra, Assistant Professor, Department of Mass Communication, Assam University Silchar. I would like to thank you for allowing me to grow as a research scholar under your supervision and encouraging my research. Your advice, suggestion and guidance on both research as well as on my future career have been invaluable. I thank you for the knowledge and lesson that I gain during the tenure of my research work, as a researcher under your sharp supervision.

I would also like to extend my gratitude to my Co-Supervisor Dr. Manoj Kumar Sinha, Associate Professor, Head of Department, Library and Information Science, Assam University Silchar for his guidance in various matters related to my research work. The knowledge I gain from you during seminar or workshop is proved to be very fruitful in my research work. Words would be less to express my thankfulness for your guidance and suggestion in completing my research work.

A special thanks to Prof. Gyan Prakash Pandey, Head of Department, Mass Communication, as well as Dean of the School of Abanindranath Tagore School of Creatives Arts and Communication Studies, Assam University Silchar and other teaching and non-teaching faculty members of the Department for their hospitality and assistance in various matters.

Finally, I would like to express my gratitude to my father Mr. Lourembam Tarun, mother Mrs. Ningshen Huimila and other members of my family for their cooperation, moral support and financial assistance in completing my research work. I am also very thankfull to my friends who are helping me in data collection of my research work.

Rajdev Lourembam

CHAPTER – I **1 - 46**

1. Frame work of the Study

1.1 Introduction

1.1.1 History of Telecommunication

1.1.2 Origin of Cellular Phone

1.1.3 Time Line of Telecommunication Development

1.1.4 Generation of Mobile Technology

1.2 Locale of the study

1.3 Objectives

1.4 Theoretical Perspective of Mobile Communication for Development

1.5 Review of Literature

1.6 Significance of the study

1.7 Research Methodology

1.7.1 Universe of the study

1.7.2 Tools for data collection

1.7.3 Sample and Sample size of the study

1.7.4 Selection of respondents from each selected villages for data collection

1.8 Definition of Technical Terms

CHAPTER – II **47-93**

2. Telecommunication Scenario in India

2.1 Introduction

2.2 Telecommunication in South Asian Region

2.3 Telecommunication in India during Colonial Period

2.4 Telecommunication in India after Independence

2.5 Demonopolization of Indian Telecommunication Sector

2.6 Mobile Phone/Cellular Phone service in India

2.7 Expansion of Indian Telecommunication Network

2.8 Present Scenario of Indian Telecommunication Network

2.9 National Telecommunication Policy 2011 and 2012

2.10 Telecommunication in Northeast India

2.11 Telecommunication in Manipur

2.12 Public Sector Undertaking Mobile Service Provider

2.12.1 Bharat Sanchar Nigam Limited (BSNL)

2.12.2 Mahanagar Telephone Nigam Limited (MTNL)

2.13 Private Sector Undertaking Mobile Service Provider

2.13.1 Vodafone

2.13.2 Bharti Airtel

2.13.3 Idea

2.13.4 Aircel

2.13.5 Reliance

CHAPTER – III **94 - 119**

3. Mobile Communication and Rural Development

3.1 Introduction

3.2 Mobile Communication

3.2.1 Types of Mobile Phone

3.3 Mobile Communication and Agriculture

3.3.1 List of Mobile Communication base application for agriculture operate in India

3.3.2 Success story of application of Mobile Communication in Agriculture

3.4.2.1 Success Story-I

3.4.2.2 Success Story-II

3.4 Mobile Communication and Rural Health

3.4.1 Success story of Mobile Communication for rural Health

3.4.1.1 Success Story-I: mHealth Fighting Malnutrition

3.4.1.2 Delivering patient HIV/AIDS care

3.5 Mobile Communication and Education

3.5.1 Case study on enhancing Education through Mobile Communication

3.5.1.1 Case study 1: Improving Literacy in Rural India: Cellphone Games in an After-School Program

3.5.1.2 Case study 2: Mobile Telephone Technology as a Distance Learning Tool in Bangladesh

3.6 Mobile Communication and Governance

3.6.1 Mobile application for governance operate in India

3.7 Mobile Communication and Rural Livelihood

CHAPTER – IV **120 - 171**

4. Analysis and Interpretation of Data

4.1 Social background of the respondents

4.1.1 Sex ratio

4.1.2 Age group

4.1.3 Occupation and Activity of respondents

4.1.4 Monthly Family income of the respondents

4.1.5 Educational qualification of respondents

4.1.6 Family size of the respondents

4.1.7 House type of respondents

4.1.8 Latrine condition of respondents

4.1.9 Fuel used by respondents for cooking

4.1.10 Source of drinking water

4.1.11 Road and Transportation condition of respondents

4.1.12 Mass media possession of respondents

4.2 Beginning year of mobile phone use by respondents

4.3 Opinion of respondents on essentiality of mobile phone

4.4 Respondents' family members (Adult) having mobile phone

4.5 Types of service used by the respondents provided by mobile service provider

4.6 Expenditure profile of respondents on mobile phone per month

4.7 Respondents' opinion on mobile phone use as wastage of time and money

4.8 Rate of respondents surfing internet

4.9 Problems while using mobile phone

4.10 Rate of respondents using mobile banking services

4.11 Respondents participation in radio/TV phone-in-program for health and agriculture

4.12 Mobile communication and cultivator/farmer group respondents

4.12.1 Gender wise correlation of mobile communication in agricultural activities

4.12.2 Age wise correlation of mobile communication in agricultural activities

4.12.3 Educational status wise correlation of mobile communication in agricultural activities

4.12.4 Family income wise correlation of mobile communication in agricultural activities

4.13 Mobile communication and labor class respondents

4.13.1 Gender wise correlation of mobile communication in labour activities

4.13.2 Age wise correlation of mobile communication in labour activities

4.13.3 Educational status wise correlation of mobile communication in labour activities

4.13.4 Family income wise correlation of mobile communication in labour activities

4.14 Mobile communication and self-employed group respondents

4.14.1 Gender wise correlation of mobile communication and self-employed

4.14.2 Age wise correlation of mobile communication and self-employed

4.14.3 Educational status wise correlation of mobile communication and self-employed

4.14.4 Family income wise correlation of mobile communication and self-employed

4.15 Correlation of mobile communication and education

4.15.1 Rate of students surfing internet for educational purposes

4.15.2 Device use for surfing internet by student

4.15.3 Rate of student subscribing SMS

4.16 Correlation of mobile communication and development service provider

4.16.1 Gender wise correlation of mobile communication and development service provider

4.16.2 Age wise correlation of mobile communication and development service provider

4.16.3 Educational status wise correlation of mobile communication and development service provider

4.16.4 Family income wise correlation of mobile communication and development service provider

4.17 Correlation of mobile communication between Respondents and Health Service Provider

4.17.1 Gender wise correlation in use of mobile communication for health

4.17.2 Age wise correlation in use of mobile communication for health

4.17.3 Educational status wise correlation in use of mobile communication for health

4.17.4 Family income wise correlation in use of mobile communication for health

CHAPTER – V **172 - 191**

5. Findings, Conclusion and Suggestion

5.1 Summary of the findings

5.1.1 Socio-economic profile of the respondents

5.1.2 Media profile of the respondents

5.1.3 Mobile phone usages pattern of the respondents

5.1.4 Problems face in using mobile phone

5.1.5 Mobile Communication and Development Activities

5.1.5.1 Mobile Communication and Agricultural Activities

5.1.5.2 Mobile Communication and Labour Class respondents

5.1.5.3 Mobile Communication and Self-employed respondents

5.15.4 Mobile Communication and Education

5.1.5.5 Mobile Communication and Development Service Provider

5.1.5.6 Mobile Communication and rural Health

5.2 Conclusion

5.2.1 Development and extension of telecommunication in rural areas

5.2.2 Pattern of mobile phone usages among villagers

5.2.3 Correlation between mobile communication and rural development

5.2.4 Effectiveness of mobile communication in rural development

5.3 Suggestion

5.4 A suggestive model for better use of mobile phone for rural development
